

Dear Students,

Regis College is taking a digital leap! Starting in September 2012, all full-time undergraduate and graduate students will receive an Apple iPad.

This is an invigorating time for students as technology is rapidly changing learning styles across the globe. These profound changes affect our entire campus community. Embracing digital technology not only provides faculty a fuller set of teaching tools, but exposes you to a more innovative and enriching learning experience. As stated by President Antoinette Hays, "Regis is becoming a leader in higher education in the kind of interactive and participatory teaching and learning that our digital world invites." Exciting!

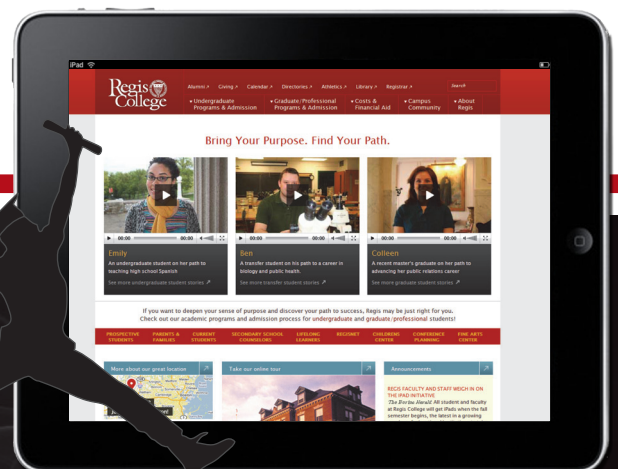

With this amazing news, we are sure you have a lot of questions, like, "When do I get mine?" and "How do I learn to use it?" Information about the iPad initiative and the support services available will be posted on the Regis College website, including answers to many of your "frequently asked questions." Additional information can be obtained at helpdesk@regiscollege.edu, and the Regis College Information Technology Services (ITS) staff are available at 781-768-7177.

We in the division of Student Affairs look forward to working with you to build a close-knit learning community by taking full advantage of this technology both inside and outside the classroom.

On behalf of the Regis College community, I wish you a wonderful rest of the summer. We look forward to seeing you on Opening Weekend.

Sincerely,

Kara Kolomitz
Dean of Students
