Are you working on a research assignment and feel stuck and don’t know where to start? Or do you need a reminder of how to use a particular feature of the databases?

Try taking a look at the library's [research guides](#). Our guides cover a variety of different subjects and even some specific classes. These guides can help you navigate the research process, from defining your PICO or research question to citing your sources and formatting your paper. Whether you’re studying [Education](#), [Nursing](#), [Public Health](#), [Social Work](#), or another discipline, there are guides relevant to your program. Our guides include information about search techniques, recommend databases, or journals relevant to specific subject areas and provide reminders of how to evaluate and cite your sources.

Please feel free to reach out to the library if you have any questions or would like suggestions on which guides might help. You can reach us by e-mail at reference@regiscollege.edu or schedule an appointment to meet with a librarian one-on-one by filling out our [Research Consultation Request form](#). Each month we share a tip from one of your peers who has had success with managing their time. The tip for this edition of GradWire comes from **Samantha Ormond, MS in Nursing (Adult Geriatric NP)** who writes:

“Even though you may feel overwhelmed, take time at the end of one week to plan out the next. Schedule time to study, spend with your family, work, exercise, run errands, sleep, or get done whatever else you must get to. There is time to get what you have to done. Learn to find joy in the process of learning!”

Thank you, Samantha! Now, it’s your turn to share your sage wisdom. If you have a tip you'd like to share in an upcoming issue of GradWire, please submit it [here](#).
